

Who else is involved?

The core partnership is composed of:

Centre for Social Innovation - ZSI Austria

Universidad Politécnica de Madrid Spain

European Schoolnet Belgium

BIFI, Universidad de Zaragoza Spain

Nanoscience Centre, University of Cambridge UK

MTA SZTAKI Hungary

Agora Systems Spain

How can I get in contact?

GLOBAL^{excursion} ↪

A new way to science education

We offer teachers and their pupils access to the experimental laboratories and resources of selected scientific experiments in order to enrich science curricula. By connecting e-Infrastructures, resources and tools with schools, pupils can experience challenging and authentic learning scenarios. Students gain insights into real scientific research, they can even contribute to it and thus stimulate interest in natural science education.

What is the ViSH?

The ViSH - Global Virtual Science Hub - is the main access point to e-Science. It contains:

- A selection of e-infrastructures and scientific learning resources
- A social network for scientists, teachers and pupils
- A virtual excursion room for live interactions between scientists and schools

What disciplines are involved?

Currently the ViSH offers access to resources from:

- Nanotechnologies
- Biotechnologies
- Volunteer computing
- Life sciences

Other disciplines are **welcome** to join in!

"I am a scientist, how can I benefit from being involved?"

Promotion of your research towards a school audience. Through direct interaction with teachers and their pupils, the scientists of the future, using networking facilities, latest communication and collaboration technologies. Introduce your audience to the experience of being a scientist!

How can I get involved?

If you are a scientist and would like to offer part of your infrastructure or scientific material to schools, please register at the ViSH.
