

Búsqueda de Objetos de aprendizaje

Repositorios de contenidos abiertos

- Existen multitud de plataformas en Internet donde **buscar** y **descargar** recursos educativos y **objetos de aprendizaje** de forma gratuita
- Muchos repositorios permiten búsquedas mediante **metadatos**
- Algunas plataformas también ofrecen herramientas de autor para **crear** contenidos
- Hay muchos repositorios de carácter general (no educativos) que permiten buscar **recursos con licencias abiertas**: Flickr, Google Imágenes, Wikimedia commons, etc.

The **ARIADNE Foundation** is a not-for-profit association that aims to:

- Carry out basic and applied research that will improve creation, sharing and reuse of knowledge through the use of technology
- Develop and deploy methodologies and software that will provide flexible, effective and efficient access to large-scale knowledge bases
- Apply the results of its research and development activities to help preserve multicultural and multilingual knowledge assets and collections
- Explore how these research and development results can be adopted and sustained so that they support educational and research communities

To support this goal, **ARIADNE** has created a standards-based technology **infrastructure** that allows the publication and management of digital learning resources in an open and scalable way. The vision that drives the continuous development of this infrastructure is to provide flexible, effective and efficient access to large-scale educational collections in a way that goes beyond what typical search engines provide. **ARIADNE** was initially set up by a network of European stakeholders, expanding now into a global network of **member institutions** sharing the same vision.

ARIADNE is a member of the **Global Learning Objects Brokering Exchange (GLOBE) Alliance** and contributing towards the development of a global learning infrastructure that can be accessible from all.

About

The Learning Resource Exchange (LRE) from European Schoolnet (EUN) is a service that enables schools to find educational content from many different countries and providers. It was developed in order to provide Ministries of Education with access to a network of learning content repositories and associated tools that allow them to more easily exchange high quality learning resources that 'travel well' and can be used by teachers in different countries.

The evolution of the LRE has been supported by Ministries of Education in Europe and a number of European Commission funded projects such as ASPECT, CELEBRATE, CALIBRATE and MELT. It is now being carried forward in projects such as eQNet and with support from the LRE's content partners.

Anyone is able to browse content in the LRE federation of repositories and teachers that register can also use LRE social tagging tools, rate LRE content, save their Favourite resources and share links to these resources with their friends and colleagues.

Additional resources from new content partners are also being regularly included in the LRE and the amount of content that schools can access is still growing rapidly.
